The courses were attended by a total of 12 members of the Rapid Response Unit. The subject of the highly specialized advanced course was to improve skills and abilities needed to drive motorcycles. The course consisted of theoretical (20%) and practical (80%) training and was designed for four key areas:

1. Driving on a paved surface on a closed racing circuit with an individual approach.
2. Advanced techniques + driving with a passenger on a paved surface in real traffic conditions.
3. Driving techniques in difficult terrain, on light off-road motorcycles.
4. Driving techniques on unpaved surface, on medium and heavy travel enduro motorcycles

During the course, all course participants expanded their skills and abilities in driving motorcycles on different surfaces.

The course met its goal and was very positively evaluated by individual members of the Rapid Response Unit.
